Project Development Phase

Sprint-2 Create Data Base

Date	04 November 2022
Team ID	PNT2022TMID49453
Project Name	VirtualEye - Life Guard For Swimming Pools To Detect Active Drowning
Maximum Marks	8 Marks

- In order to manage a connection from a local system you must first initialize the connection by constructing a Cloudant client.We need to import the cloudant library.

- we have to give username & apikey to build the connection with cloudant DB

- Once a connection is established you can then create a database, open an existing database.

- Then create a database as my_database.

- Data Base will be created
